*“ From the  
America’s Cup  
directly  
to the future. ”*

The BGF is the second range of multihulls which contain many advanced technological elements inspired by the avant-garde BGH-HSV (Hydrogen Support Vessel), the hydrogen-powered chase boat created to accompany the New York Yacht Club American Magic team and the Orient Express Racing Team during the 37th America's Cup. From BGH, the maximum expression of sustainability nowadays, the brand seized the opportunity to bring the foil technology to a wider audience.

Starting with an extreme one-off boat, designed for a specific purpose to prove that the limits of technology in the service of sustainability can be overcome, Bluegame brings to the market a yacht that combines performance and sustainability to an unprecedented level.

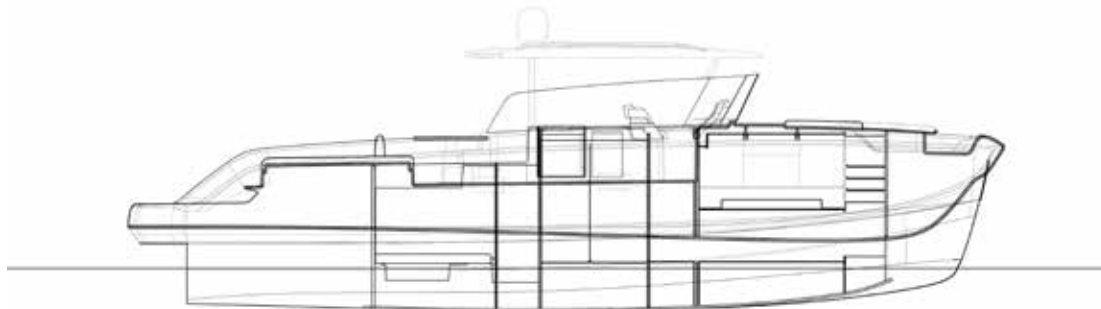

BGF45
